EDUCATION

- Tongji University** Shanghai, China
Urban Planning; GPA: 4.91; Rank: 1/19
September 2023 - Present
Courses:
Design Studio & Spatial Design Design Fundamentals I, II, III, Digital-Intelligent Spatial Design I: Geometric Representation of Space, Digital-Intelligent Spatial Design II: Multimodal Spatial Construction (All graded Excellent)
Quantitative & Computational Skills Advanced Mathematics, Probability and Mathematical Statistics, Python Programming, Computer Graphics, Spatial Analysis and Modeling with Python (All graded Excellent)

SKILLS SUMMARY

- Prototyping:** AutoCAD, SketchUp, Rhino, Grasshopper, Blender
- Design:** Figma, Photoshop, Illustrator, InDesign, V-Ray, D5,Procreate
- Coding:** Python, JavaScript, SQL, React, Node.js
- Soft Skills:** Leadership, Event Management, Writing, Public Speaking, Time Management

WORK EXPERIENCE

- Husiweier (Shanghai) Business Consulting Studio** Remote
New Media Intern Sep 2025 – Present
 - Content Planning and Production:** Planned and produced content for the official WeChat public account, including topic research, copywriting, and layout coordination.
- Sichuan Jingxing Motorcycle Co., Ltd.** Sichuan, China
Data Analysis Intern July 2025 – Aug 2025
 - Customer Behavior Analysis:** Conducted multi-dimensional analysis of customer data to identify behavioral patterns and support business decision-making.
 - Data Analysis and Insight Communication:** Conducted data cleaning, preprocessing, and validation, and translated processed data into visual dashboards and reports to support accurate analysis and effective communication of insights.

PROJECTS

Research Projects

- Mechanisms of How Depth Distribution of Visual Elements Influences Pedestrian Leisure-walking Behavior in Metro Walkways:** (In progress) Contributed to theoretical framework construction and methodological foundation development for a deep perception-based spatial depth zoning–pedestrian trajectory association model. Conducted interdisciplinary literature synthesis spanning computer vision, spatial visual indicators, and pedestrian behavioral mechanisms; supported variable logic structuring and indicator system refinement for subsequent SHAP-based interpretability analysis and spatial design strategy formulation. (Nov 2025 – Present)
- A Systematic Review of Multimodal Large Language Models and Human Behavioral Interaction Mechanisms (CHI-Oriented Research):** Conducted a systematic review of research published over the past five years on multimodal large language models (LLMs) and their interaction with human behavioral mechanisms. Constructed a structured literature screening and classification framework, and developed an auxiliary literature analysis tool to support efficient synthesis and structured aggregation. Contributed to the overall theoretical architecture of the paper and was responsible for designing the conceptual framework diagram, clarifying the logical relationships between multimodal model capability dimensions and behavioral impact mechanisms. (Aug 2025 – Sep 2025)
- Effects of Street Façade Design Strategies on Pedestrian Psychological Responses in Urban Renewal–A Neuro-Architectural Study Using AIGC-fNIRS Framework:** (In progress) Led project coordination and research design for constructing a strategy model based on fNIRS neuroimaging data; responsible for experimental planning, data processing, and statistical analysis. (July 2025 – Oct 2025)

Development Projects

- Living Jade (Android App):** Developed an Android app integrating personality assessment with educational content and an AI jade expert using LLM.
- Constraint-based Architectural Floorplan Generation Tool:** Developing a tool to generate floorplans with configurable real-world constraints, exploring automated spatial layout design.

HONORS AND AWARDS

- National Scholarship for Undergraduate Students, Tongji University - 2024, 2025
- Outstanding Student Award, Tongji University - 2024, 2025
- Social Activity Scholarship, Tongji University - 2024
- Silver Award (Two Projects), China International College Students' Innovation Competition - 2024
- Third Prize, Shanghai Women College Students Innovation & Entrepreneurship Competition (Creative Track) - 2023
